

Outcomes

Here at the B.D.B.C. / Mission Samoa program, we pride ourselves in the success, health, and security of our clients. We have been instrumental in changing lives through work development training and placement since the beginning of our program. We continue to seek new and innovative ways to enhance our program goals and maintain a high standard of outcomes. We measure the success of our clients by employment at living wage, secure independent living, and 6 months of continuum of care following the completion of their program. A healthy transition back into society is the last and final phase towards a new beginning of life for our clients.

Since B.D.B.C. / Mission Samoa's inception, we have served a total of 202 clients with an annual average of 40 clients per year at success rate of 87%. In the year 2020, our numbers have decreased below average as a result of the COVID-19 pandemic. Despite the obstacles and challenges, B.D.B.C. / Mission Samoa was able to serve a total of 25 clients with a success outcome of 80%. We will continue to seek new and innovative ways to enhance the quality of our services to those that we are entrusted to serve.
